Additional Tracker

If you own a FLARM or FANET enabled device you can use it as an auxiliary tracker in case your mobile phone is low on battery. We strongly suggest users to do so because having additional trackers provides better live-tracking results!

To register your device, use the unique (radio) id that is 6 characters long and consists of numbers and the letters A to F.

Device Type	Id

Install the «zenit» app

- Install the zenit app from the Appstore
- Register your email address and confirm it

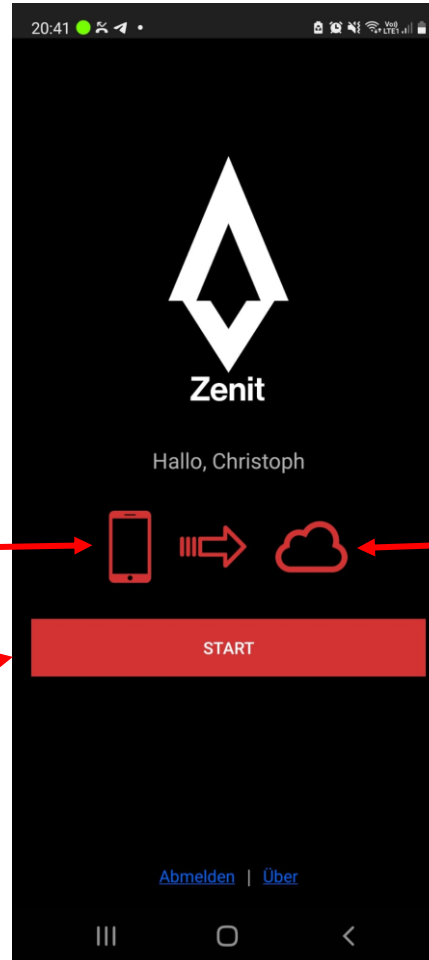

start Zenit

- Press START until the button is green.

- Drücke START bis der Button grün ist.

If this icon is red, check your device settings:
GPS on, Flightmode of, settings ok?

If this button is green the tracking is running.

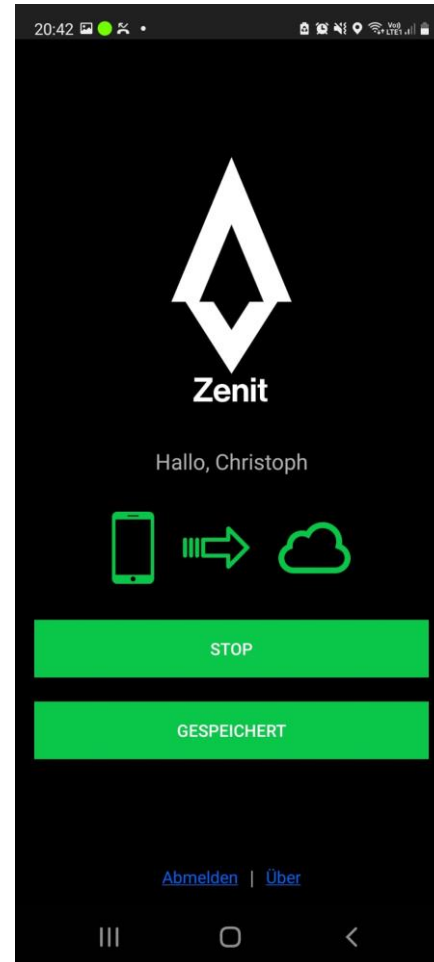

If this button is green connection is ok. (wait 10 seconds)

confirm position

- Confirm reaching a turnpoint Manuel by holding the button for 1 second.

- Bestätige das Erreichen eines Turnpoints Manuel, indem du den Button 1 Sekunde gedrückt hältst.

BEFORE competition starts

- Download the latest app version to your phone. [ANDROID](#) or [iOS](#)
- If you have an Android phone, be sure that the Zenit app has all the permissions to run in the background. [Look here](#)
- Please do not complete the two steps above after the competition starts. Do not wait until just before the event.
- Complete a training run with the app to make sure your battery and GPS settings are working as they should.
- Make sure your battery is fully charged.
- make sure you have a backup device that records in IGC format.

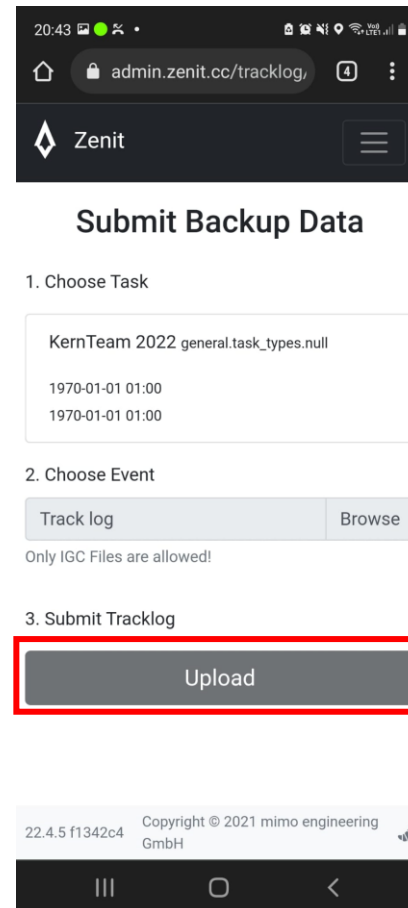

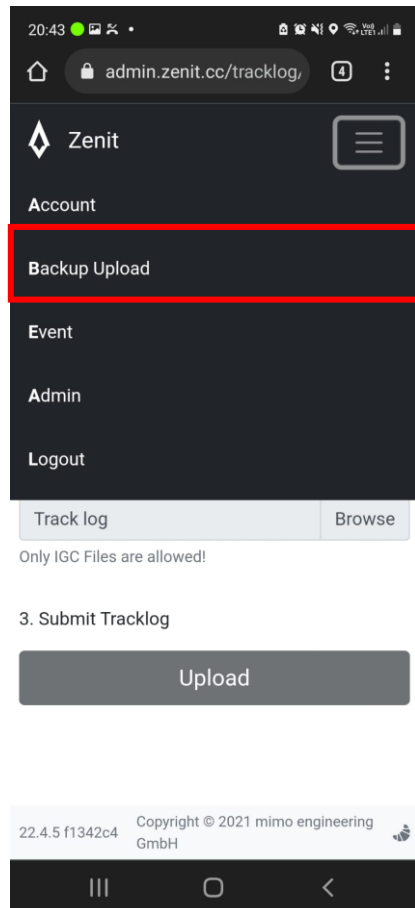

ON the competiton day

- Close all other apps that you don't need during the race. After all, you don't want your battery to die sooner than you do!
- Please be outside 5 to 10 minutes before the start and make sure you have an adequate GPS connection.
- Remember, before you start, press the START button 2x so we can track you and your start inside of the start cylinder.
- During the race, you should check every now and then to make sure the app is still running. Especially when you are passing through a cylinder, but the button!

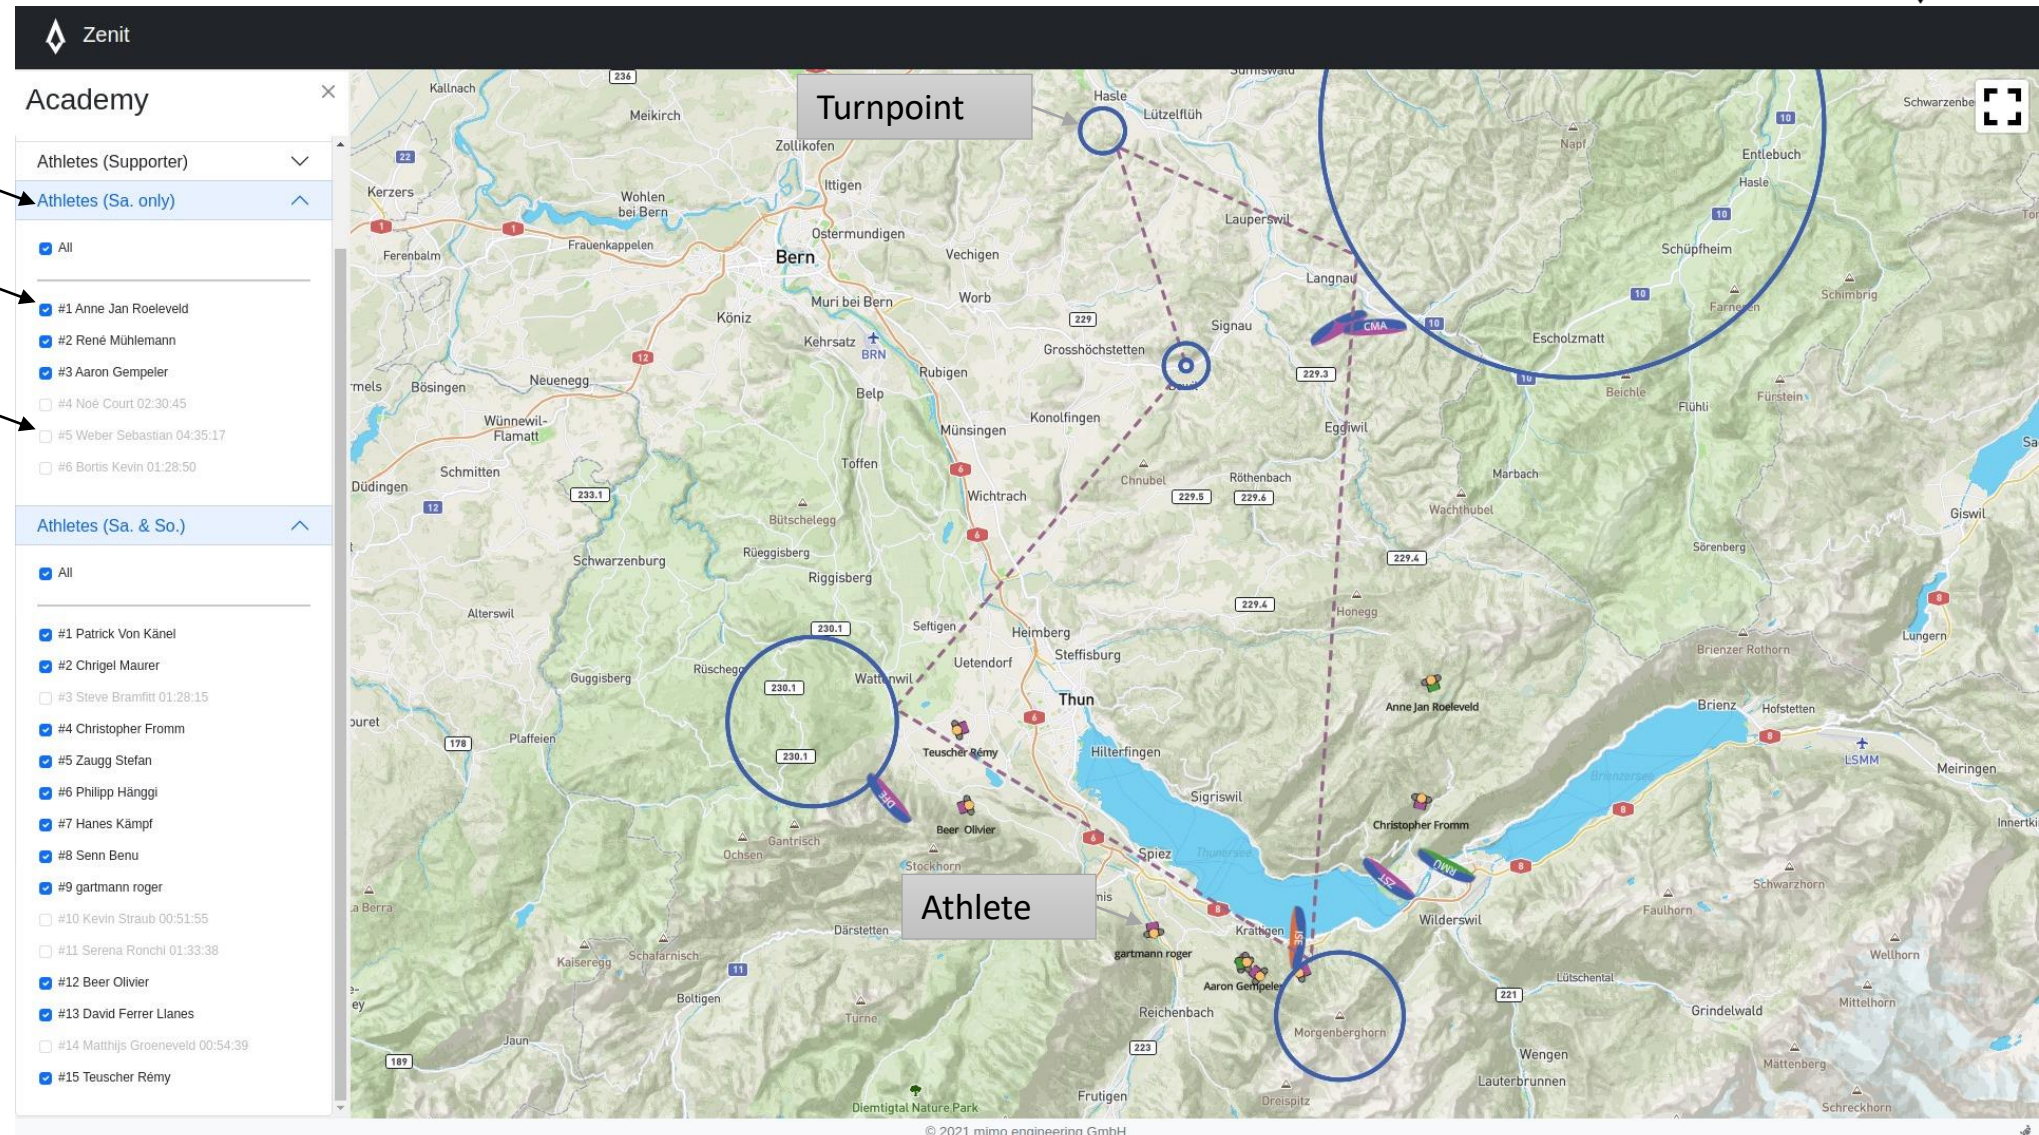

AFTER the competition day

- Upload your IGC Backup file if needed.
